

1. Fun Tech Line – RIP

	Sizes	Windrange
RIP FT 33:	133 x 40 cm	10-35 knts.
RIP FT 36:	136 x 42 cm	9-29 knts.

Features:

- **3-D-shape + full suspension tips**
The price-orientated boards of the Fun Tech Line are the perfect Freeride boards. Even here the Full Suspension Tips and a Semi 3D-Shape are utilized which together with the Soft-Rails provide a generally softer ride feel than the HT-Boards.
- **Full-Wood-Core made from “Paulownia-Wood”**
The lower weight of the '09 Spleene Boards is immediately noticeable and provides them with much better acceleration and a more dynamic take-off. This improves their overall ride-performance, provides a more direct feel and better control in overpowered conditions.
- **Classic Convex Outline** makes the board more manoeuvrable than a concave outline.
- **Progressive Scoop-Rocker Line** for ultimate manoeuvrability and early planing ability.
- **Soft edges** - The Fun-Tech-Rails have a soft shape. These “softer rails” make the board more forgiving to ride and corrects the riders mistakes.

Accessories:

- **G10 Fins:** 4 x 4,7 cm; dyed G10 Material
- **Fun Tech Pad:** Super soft 3D-Injection-Moulded-Pad
- **Fun Tech Strap** (Velcro-Adjustment)
- **Grab-Handle**

The RIP 33 is the most radical board in the FT-Line and covers the middle to upper windrange. The RIP 36 is most suited to the middle wind strengths and can also be used as a “One Board Quiver”. The quality of workmanship on the FT-Line is as high as on the HT-Line. At Spleene we don't cut corners to achieve our goals.

2. Fun Tech Line – SESSION

	Sizes	Windrange
Session FT 42:	142 x 42 cm	8-24 knts.

Features:

- **3-D-shape + full suspension tips**
The price-orientated boards of the Fun Tech Line are the perfect Freeride boards. Even here the Full Suspension Tips and a Semi 3D-Shape are utilized which together with the Soft-Rails provide a generally softer ride feel than the HT-Boards.
- **Full-Wood-Core made from “Paulownia-Wood”**
The lower weight of the '09 Spleene Boards is immediately noticeable and provides them with much better acceleration and a more dynamic take-off. This improves their overall ride-performance, provides a more direct feel and better control in overpowered conditions.
- **Concave Outline** enables the board to ride at an extreme angle to the wind.
- **Progressive Scoop-Rocker Line** for ultimate manoeuvrability and early planing ability.
- **Soft edges** - The Fun-Tech-Rails have a soft shape. These “softer rails” make the board more forgiving to ride and corrects the riders mistakes.

Accessories:

- **G10 Fins:** 4 x 4,0 cm; dyed G10 Material
- **Fun Tech Pad:** Super soft 3D-Injection-Moulded-Pad
- **Fun Tech Strap** (Velcro-Adjustment)
- **Grab-Handle**

The Session covers the middle windrange and thanks to its concave outline rides at an extreme angle to the wind. It is the link between the RIPs, for more wind and the Doors for extremely light winds. Because of its short overall length it remains very manoeuvrable. The new Rocker-line makes all of the new boards feel even smaller under foot.

3. Fun Tech Line – Door

	Sizes	Windrange
Door FT 60:	160 x 44 cm	6-22 knts.

Features:

- **3-D-shape + full suspension tips**
The price-orientated boards of the Fun Tech Line are the perfect Freeride boards. Even here the Full Suspension Tips and a Semi 3D-Shape are utilized which together with the Soft-Rails provide a generally softer ride feel than the HT-Boards.
- **Full-Wood-Core made from “Paulownia-Wood“**
The lower weight of the '09 Spleene Boards is immediately noticeable and provides them with much better acceleration and a more dynamic take-off. This improves their overall ride-performance, provides a more direct feel and better control in overpowered conditions.
- **Concave Outline** enables the board to ride at an extreme angle to the wind.
- **Flat Scoop-Rocker Line** for ultimate manoeuvrability and early planing ability.
- **Soft edges** - The Fun-Tech-Rails have a soft shape. These “softer rails” make the board more forgiving to ride and corrects the riders mistakes.

Accessories:

- **G10 Fins:** 2 x 4,0 cm + 2 x 5,5 cm; dyed G10 Material
- **Fun Tech Pad:** Super soft 3D-Injection-Moulded-Pad
- **Fun Tech Strap** (Velcro-Adjustment)
- **Grab-Handle**

The Fun Tech Door is the ultimate light-wind board in the FT-Line. Thanks to the low weight and the soft Shape the board feel manoeuvrable and agile under foot and also provides a great platform for beginners.
